

The Barnhardt

Description

Traditionally styled, this home will never lose its elegance. And, the extraordinary floorplan will serve you well through every life stage. The drama of the two-story foyer beckons, drawing you into the formal living room with its bay window and fireplace. The living room and adjoining dining room are open to the foyer, but defined by a series of columns. A stately angled staircase is centrally located for convenience. The family area revolves around the staircase. The huge kitchen features an island with a self-venting cooktop, a walk-in pantry, and a corner bake center. A sizable desk abuts the staircase. French doors in the bayed breakfast nook opens to a covered patio. A corner fireplace creates a focal point for the two-story family room. A curved railing on the staircase landing lets you overlook the family room. On the upper floor, an expansive master suite carries all the luxurious amenities one would expect in a home of this caliber. The bedroom is enriched with a decorative tray ceiling and bay window. French doors lead to a private covered deck. The bath is equipped with a whirlpool tub and walk-in shower. Three other bedrooms, a den and a bathroom round out the upper floor. The home plan includes an attached garage, which can be built for two cars or three, allowing adaptability for different sized properties.
